Aula Pocchiari, Istituto Superiore di Sanità
Viale Regina Elena 299, 00161 Rome, Italy

About
MELODI, Multidisciplinary European Low-Dose Initiative (www.melodi-online.eu), is a European Platform dedicated to low dose risk research. Goals of MELODI are: to improve radiation protection standards in Europe; to prioritize and focus European research efforts to achieve maximal impact on scientific knowledge; to avoid duplication of research, with a view to consolidating the current scientific basis for the system of radiation protection.

The Third International MELODI Workshop will offer attendants the great opportunity to be informed about the latest updates on low-dose research issues, and the possibility to actively participate in the discussion about the next steps for implementing the Strategic Research Agenda. Selected contributions will be presented in a poster session.
